**• TOWARDS AN INTEGRATED
TRANSPORT SYSTEM –
FREIGHT FOCUS**

Research contributing to integration
and interoperability across Europe

Contents

	Executive summary	1
1)	Integrating the freight transport system: The scope of the topic	2
2)	Policy background: The developments of the common transport policy	5
3)	Research context: Improving technology, harmonising regulation and management	10
4)	Research programmes: The funding frameworks	12
5)	Research results and benefits: Findings on individual transport modes and intermodality	13
6)	Policy implications of research: What to do now?	26
7)	Future research developments: What next?	29
8)	References	31
	Glossary	36

This publication was produced by the Transport Research Knowledge Centre (TRKC) consortium on behalf of the European Commission's Directorate-General for Mobility and Transport. The information in this document has been collected by the partners in the project. We would like to thank Peter Wolters from the European Intermodal Association for his review of the manuscript.

While the information contained in this brochure is correct to the best of our knowledge, neither the consortium nor the European Commission can be held responsible for any inaccuracy, or accept responsibility for any use made thereof.

Additional information on transport research programmes and related projects is available on the Transport Research Knowledge Centre website at www.transport-research.info

Manuscript completed by Paolo Delle Site and Marco Valerio Salucci (DITS – Sapienza Università di Roma) and Damian Stantchev and Anthony Whiteing (ITS Leeds), May 2010.
